

Biotechnology is a diverse, complex and rapidly evolving field. Students and experienced researchers alike face the challenges of staying on top of developments in their field of specialty and maintaining a broader overview of the field as a whole. Volumes containing competent reviews on a diverse range of topics in the field fulfill the dual role of broadening and updating biotechnologists' knowledge. The current volume is an excellent example of such a book. The topics covered range from classical issues in biotechnology - such as, recent advances in all-protein chromophore technology- to topics that are focused on sequencing and recombinant vaccines. The information presented in this book will therefore will be of great value to both experienced biotechnologists and biotechnologists in training.

* Includes over 200 figures with more than 60 tables* Discusses valuable information on pharming & transgenic plants * Provides detailed information on the production of plasmid DNA for pharmaceutical use

Children of the Dust, Dark Widow - Part-Two-of-Three, Traditions of the Tinguian; a Study in Philippine Folk-Lore (Field Museum of Natural History Publication 180 Anthropological Series Vol. XIV No. 1), Lincolns Avengers - Justice Revenge and Reunion After the Civil War, New Holland 3102/3106/3110/3114 SpreaderOEM OEM Owners Manual, Wit and humor of the age,
