

## The Paladin Principle

Western civilization is at war with radical religious ideologues. It is a new kind of war the West is unaccustomed to fighting. The opponent strikes randomly, uses difficult to defend suicidal tactics and hides intermingled among the general population. Politically correct Rules of Engagement and international law makes it difficult to pursue these terrorists and dispense the justice they rightly deserve. They are often supported by rogue states or well-financed organizations that defy international standards and threaten global chaos. And in an age of weapons of mass destruction they are capable of murdering millions and destroying economic infrastructure in an instant. The West is philosophically ill-equipped to confront this kind of adversary and destroy them where they live. But it must be done. Hard core brutal terrorists cannot be changed. They are programmed to kill. They must be eliminated. Somebody has to do it. Who will accept the responsibility of defending civilization against the barbarians? Who will be that paladin of the powerless? Who will be that somebody? This book is about that somebody, a small group of clandestine warriors who have the experience, the skills and the motivation to fight terrorism and avenge its evil deeds.
